

Use Case Diagram

User Stories

As a mom I like reading books so much so I registered to Di-Lib system and I can search and find my favorite books and I can read them. This makes me save a lot of time to find a book and save a lot of space in my home because all of this is digital.

User number 1

I am a middle age man who likes reading books since childhood. Sometimes my work become so much and I can't find any time to look new books to read so I registered on Di-Lib and my life is changed. I can find any category on the system and select a book as I like in my home. With that I don't need to go to a book store to find new books and new genres.

User number 2

I am a student who likes to collect different books of a different series. I can call myself a collector. But it can be a difficult thing because sometimes I can't find the books I want or some books are not being printed anymore. This makes my hobby very unpleasant. That is why I joined the Di-Lib. On the system I can find every book I want and I can build my own digital library. I can collect the books I looking for easily. Di-Lib helped me a lot.

User number 3

I am a critic of a some newspaper. I am sharing my own comments on my page. But my comments can not be read by majority. Not everyone is reading the newspaper that I write. When I heard I can share my comments on Di-Lib I registered the system so now I can share my comments about the books on my page and with that I can reach much more people than newspapers. This is a whole new level for my job.

User number 4

I am a amator writer. For many years I wrote many books but none of them has been published. Publishers didn't like my books or they think they couldn't earn much money. This made me very upset for many years. But some time ago I heard a app that named Di-Lib. I found I can publish my books on the system online and I registered and published my books. People loved them. They posted thousands of good review to my books. With the help of Di-Lib I published my books.

User number 5

User stories are not too big or complex. Our team decided not to break down any story.
